

# **SOUTH WALES REGIONAL AGGREGATES WORKING PARTY**

**ANNUAL REPORT FOR 2020**  
**Published May 2023**

The statistics and statements contained in this report are based on information from a large number of sources and are compiled to an appropriate level of accuracy and verification.

Readers should use corroborative data before making major decisions based on this information.

The SWRAWP wishes to acknowledge the financial support of the Welsh Government which has enabled this report to be coordinated and published. The SWRAWP also wishes to record its thanks to all those in the mineral industry and the Mineral Planning Authorities in South Wales who have contributed to the production of this report.

Technical Secretary:  
Hugh Towns B.Sc. (Hons), Dip.T.P., M.R.T.P.I., MInstLM  
Regional Minerals & Waste Planning Manager

## 1. INTRODUCTION

1.1. This report has been prepared by the South Wales Regional Aggregate Working Party (SWRAWP) and **covers the calendar year 2020**. Each year, the SWRAWP co-ordinates the aggregate sales information received from all mineral operators via the eighteen local planning authorities which make up the South Wales region. Where annual survey returns have not been made, estimated data has been used. The work of the SWRAWP has been funded by Welsh Government (WG) since April 2002. The current grant funding runs until March 2023.

1.2. The collated information in this report makes a significant contribution to the ongoing study of supply and demand patterns, and provides a vital input into the monitoring and review of Welsh Government's policy for aggregates enshrined in Planning Policy Wales and amplified in Minerals Technical Advice Note 1: Aggregates (MTAN1). It also assists in the monitoring of progress towards the achievement of the recommendations set out in the *Regional Technical Statement – Second Review (RTS2) – September 2020*. This information is also necessary to Local Planning Authorities in carrying out their statutory functions in respect of the preparation of local development plans and the determination of planning applications. The information is also made available to the general public and industry, the latter using it to assist in planning new investment.

1.3. The Mineral Products Association (MPA) has issued advice to its members in relation to the confidentiality of data on aggregates supply which is supplied to Local Planning Authorities in response to the annual aggregate working party survey. All data is provided on a 'Commercial in Confidence' basis and can be used by Local Planning Authorities for purposes associated with their planning functions so long as it prevents data being ascribed to individual planning units, unless specific permission to use the data is given by the operator. The British Aggregates Association have always encouraged members to fully disclose relevant information.

## 2. SOUTH WALES REGIONAL AGGREGATES WORKING PARTY

2.1. The SWRAWP is one of eleven Aggregates Working Parties (AWPs) in England and Wales which provide information and advice to the Department for Levelling Up, Housing and Communities (DLUHC) and to the Welsh Government in relation to the supply of, and the demand for, aggregate minerals.

2.2. The SWRAWP is a technical working group with membership drawn from officers of the 18 Local Planning Authorities, representatives of the Mineral Products Association (MPA), the British Aggregates Association (BAA), representatives of the construction and demolition industry, Welsh Government, The Crown Estate and Natural Resources Wales. It is not a policy making body. A list of members at the date of publication of this report is provided in Appendix A.

2.3. One ordinary meeting of the SWRAWP was held in 2020 – October.

2.4. Meetings were held with the NWRAWP Secretary and Welsh Government officials to discuss RAWP contract work and the RTS2. Regular contact has been maintained with Local Planning Authority Officers to ensure robust and consistent data is used for the annual survey.

2018	2.91	1.99	4.02	8.92	91.58	0	0.12	0	0.12	1.23	0	0.21	0.49	0.70	7.19	9.74	+0.6%
2019	3.04	1.72	3.60	8.36	89.51	0	0.17	0	0.17	1.82	0	0.24	0.57	0.81	8.67	9.34	-4.1%
2020	3.07	1.58	3.27	7.92	89.80	0	0.16	0	0.16	1.81	0	0.24	0.50	0.74	8.39	8.82	-5.6%

**FIGURE 1 – Primary Aggregate Sales 2011-2020 (million tonnes)**

3.1 Table 1 shows the total primary aggregate sales from the region over the 10 year period 2011-2020, subdivided between South West Wales, South East Wales and Powys/BBNPA. These sub-regions correspond to the areas for which data has been available over the last 10 years allowing data to be compared and at the same time respecting confidentiality.

3.2 South West Wales is made up of the following Mineral Planning Authorities – Carmarthenshire, Ceredigion, Pembrokeshire, Pembrokeshire Coast National Park, Neath Port Talbot and Swansea.

3.3 South East Wales is made up of Blaenau Gwent, Merthyr Tydfil, Monmouthshire, Newport, Torfaen, Bridgend, Caerphilly, Cardiff, Rhondda Cynon Taf and the Vale of Glamorgan.

3.4 The total sales of primary aggregate decreased by 5.6% in 2020 to 8.82 million tonnes compared to 9.34 million tonnes in 2019. This is in addition to a decrease in sales of 4.1% in 2019.

3.5. Crushed rock sales fell to 7.92 million tonnes in 2020 compared to 8.36 million tonnes in 2019, with a decrease in sales of 330,000 tonnes being in South East Wales and a decrease of 140,000 tonnes in South West Wales compared to 2019. Sales in Powys/BBNPA were up 30,000 tonnes compared to 2019.

3.6 Marine sand and gravel sales decreased to 740,000 tonnes in 2020 compared to 810,000 tonnes in 2019, returning closer to the 2018 level with the decrease relating entirely to South East Wales.

3.7 Land-won sand and gravel sales in 2020 also decreased slightly to 160,000 tonnes from 170,000 tonnes in 2019. Land won sand and gravel sales come exclusively from sites in South West Wales.

3.8 Figure 1 shows that there is an upward trend in total aggregate sales since 2012 but this trend appears to have tailed off since 2015 and shows a decline in 2019 and 2020.

3.9 Crushed rock accounts for 89.80% of primary aggregate sales with marine landings contributing 8.39% and land won sand and gravel approximately 1.81%.

3.10 South East Wales has the highest crushed rock sales at 3.27 million tonnes (41%), with Powys (including Brecon Beacons) at 3.07 million tonnes (39%) and South West Wales 1.58 million tonnes (20%). Marine sand and gravel sales are highest in South East Wales at 500,000 tonnes (68%) with South West Wales accounting for 240,000 tonnes (32%).

3.11 It is difficult to quantify exactly the impact the Coronavirus pandemic had on sales but it is fair to say that the impact is likely to have made a significant contribution to the reduction in sales.

#### 4. CRUSHED ROCK

**Table 2**  
Crushed Rock Sales by Rock type and End Use in 2020 (million tonnes)

	Coated Roadstone	Uncoated Roadstone	Concrete Aggregate	Fill/Other Construction Uses	Rail Ballast	TOTAL AGGREGATE	Total Non-Aggregate
Limestone	0.21	0.44	0.87	2.30	0	3.82	0.74
Sandstone	1.26	0.28	0.10	1.06	0	2.70	0.02
Igneous	0.31	0.05	0.05	0.99	0	1.40	0.00
<b>TOTAL</b>	<b>1.78</b>	<b>0.77</b>	<b>1.02</b>	<b>4.35</b>	<b>0</b>	<b>7.92</b>	<b>0.76</b>

NB - Figures contain estimates where no survey return was provided

**Table 3**  
Crushed Rock Sales by Rock type and End Use in 2019 (million tonnes)

	Coated Roadstone	Uncoated Roadstone	Concrete Aggregate	Fill/Other Construction Uses	Rail Ballast	TOTAL AGGREGATE	Total Non-Aggregate
Limestone	0.25	0.74	0.85	2.43	0	4.27	0.71
Sandstone	1.28	0.41	0.17	0.94	0	2.80	0.02
Igneous	0.28	0.06	0.02	0.93	0	1.29	<0.01
<b>TOTAL</b>	<b>1.81</b>	<b>1.21</b>	<b>1.04</b>	<b>4.30</b>	<b>0</b>	<b>8.36</b>	<b>0.74</b>

NB - Figures contain estimates where no survey return was provided

**FIGURE 2 – Crushed Rock Sales by End Use 2020**

4.1 Sales of all types of crushed rock for coated roadstone, concrete aggregate and fill/other constructional uses remained relatively static during 2020.

4.2 Sale of crushed rock for uncoated roadstone decreased by 440,000 tonnes in 2020 compared to 2019 with 300,000 tonnes of the decrease being limestone sales and 130,000 tonnes of the decrease being sandstone sales.

4.3 Total limestone sales reduced by 450,000 tonnes, total sandstone sales decreased by 100,000 tonnes, and total igneous sales increased by 110,000 tonnes in 2020 compared to sales in 2019.

4.4 Fill/other constructional uses remains the primary use for crushed rock, utilising 55% of all sales (up 4% from 2019). Coated roadstone utilises 22% (no change from 2019), uncoated roadstone utilises 10% (down 2% from 2019) and concrete aggregate utilises 13% of all rock sales (down 2% from 2019).

**Table 4**  
**Crushed Rock Sales by Mineral Planning Authority 2018-2020 (million tonnes)**

Sub-Region	Mineral Planning Authority	Crushed Rock Sales 2018	Crushed Rock Sales 2019	Crushed Rock Sales 2020	
Powys (inc Brecon Beacons)	Powys	2.91	3.04	3.07	
	Brecon Beacons NP				
South West Wales	Carmarthenshire	0.91	0.83	0.65	
	Neath Port Talbot	0.39	0.35	0.33	
	Pembrokeshire	0.50	0.48	0.52	
	Pembrokeshire Coast NP				
	Ceredigion	0.19	0.06	0.09	
	Swansea	0	0	0	
South East Wales	Blaenau Gwent	0.86	0.78	0.62	
	Caerphilly	0	0	0	
	Torfaen		0	0	
	Newport			0	0
	Monmouthshire				0
	Rhondda Cynon Taf	0.83	0.67	0.47	
	Merthyr Tydfil	2.33	2.15	2.17	
	Bridgend				
	Cardiff				
Vale of Glamorgan					
<b>TOTAL</b>		<b>8.92</b>	<b>8.36</b>	<b>7.92</b>	

4.5 Table 4 sets out the crushed rock aggregate sales figures subdivided by sub-region and Local Planning Authority, however some data has been amalgamated for confidentiality reasons.

4.6 Sales of crushed rock in Powys/BBNPA increased by 30,000 tonnes between 2019 and 2020.

4.7 Sales in South West Wales decreased by 130,000 tonnes between 2019 and 2020 having reduced by 270,000 tonnes between 2018 and 2019. There was a significant decrease in sales of 180,000 tonnes in Carmarthenshire.

4.8 Sales in South East Wales decreased by 340,000 tonnes between 2019 and 2020 having reduced by 420,000 tonnes between 2018 and 2019. There was a significant decrease of 160,000 tonnes from Blaenau Gwent/Caerphilly and 200,000 tonnes from RCT/Merthyr.

## LANDBANK

4.9 A landbank is a stock of planning permissions for the winning and working of minerals. The landbank figures in Table 5 below have been calculated according to the methodology set out in the RTS2 in that the historical sales figures should reflect, not just the 10-year average (as had been used in the First Review or the 3-year sales average as set out in MTAN1, but the highest of the 10-year and 3-year averages for each individual LPA. The permitted reserves are those estimated to be suitable for production of saleable aggregates, including low quality fill. Where operators did not provide information on aggregate sales and/or reserves, best estimates have been made from the local knowledge of Local Planning Officers and any past returns.

4.10 Caution must be exercised in using these landbank figures. The landbank calculation does not take account of geographical or operational aspects which may restrict the availability of certain types of reserves. In addition, the reserves in many cases have been estimated using limited sampling and testing information and the marketing conditions prevailing at the time and may be subject to revision.

4.11 Dormant sites and sites where planning permission has been suspended have **not** been included in the landbank calculations. Local Planning Authorities should carry out their own assessments of the likelihood of reactivation of each site but in any case dormant reserves must be counted separately.

4.12 It is important to note that reserves earmarked as being suitable for aggregates may also be suitable for non-aggregate use. Many carboniferous limestone hard rock quarries produce significant amounts of rock suitable for both uses and these may change from year to year with market demand. Whilst many quarries may have less than 10% non-aggregates, some may have up to 90%. Non-Aggregate reserves have **not** been included in the landbank calculations.

**Table 5**

**Crushed Rock Reserves and Landbanks on 31.12.2020 by Mineral Planning Authority (million tonnes) based on 3 year average sales 2018-2020 and the 10 year average sales 2011-2020**

Mineral Planning Authority	Crushed Rock Reserve 31.12.2020	3-year Average Annual Sales 2018-2020	10-year Average Annual Sales 2011-2020	Landbank (years) based on highest average
Powys	192.76	3.01	3.03	>50
Brecon Beacons NP				N/A
Carmarthenshire	62.92	0.80	0.78	>50
Neath Port Talbot	15.38	0.36	0.35	43
Pembrokeshire	25.15	0.50	0.52	39
Pembrokeshire Coast NP				N/A
Ceredigion	5.42	0.11	0.15	36
Swansea	0	0	0	0
Blaenau Gwent	24.44	0.76	0.52	2
Caerphilly				41
Torfaen	0	0	0	0
Newport	0	0	0	0
Monmouthshire	*	*	*	>50
Rhondda Cynon Taf	62.36	0.66	0.69	12
Merthyr Tydfil				>50
Bridgend	78.14	2.22	2.09	>50
Cardiff				27
Vale of Glamorgan				39
	*	*	*	

4.13 The crushed rock reserves indicated above are made up of the following percentage of rock types:

- Powys/BBNPA – 68% Sandstone, 17% Limestone and 15% Igneous
- South West Wales – 46% Limestone, 39% Sandstone and 15% Igneous
- South East Wales – 84% Limestone, 16% Sandstone

4.14 On the basis of the figures in Table 5, Blaenau Gwent and RCT have a landbank of less than 25 years. Where landbanks exceed 50 years these have been shown as greater than 50 years as some landbanks are arithmetically high due to significant reductions in production but could reduce very quickly if production increased. The arithmetical landbank figures, expressed in years, would therefore give a potentially misleading picture.

**Table 6  
Crushed Rock Reserves at Dormant/Suspended Sites by Mineral Planning Authority (million tonnes)**

Region	Mineral Planning Authority	Crushed Rock Reserve 31.12.2020
Powys (inc Brecon Beacons)	Powys	0.36
	Brecon Beacons NP	
South West Wales	Carmarthenshire	11.29
	Ceredigion	0
	Pembrokeshire	0
	Pembrokeshire Coast NP	
	Neath Port Talbot	0
	Swansea	0
South East Wales	Blaenau Gwent	5.21
	Caerphilly	
	Torfaen	0
	Newport	0
	Monmouthshire	0
	Rhondda Cynon Taf	0
	Merthyr Tydfil	
	Bridgend	13.15
	Cardiff	
	Vale of Glamorgan	
<b>SOUTH WALES TOTAL</b>		<b>30.01</b>

4.15 Table 6 above sets out the reserves of crushed rock at dormant<sup>1</sup> sites and sites where planning permission has been suspended. These reserves are not included within landbanks but can be used to offset against allocation requirements in a LDP provided an assessment of the likelihood of the future operation of the site concludes that it is likely to reactivate.

<sup>1</sup> Sites with planning permission but working cannot re-commence until full modern conditions have been approved by the local planning authority

## 5.0 LAND WON SAND & GRAVEL

<b>Table 7 Land won Sand &amp; Gravel Sales by end use 2019 &amp; 2020</b>				
	<b>Tonnes 2019 (000)</b>	<b>2019 %</b>	<b>Tonnes 2020 (000)</b>	<b>2020 %</b>
Building/soft sand for coating for asphalt/mortar	70	41	59	37
Concreting/sharp sand	38	22	31	19
Gravel – concrete aggregate, other uses	44	25	50	31
Raised material for constructional fill/unknown	20	12	20	13
<b>Total</b>	<b>172</b>	<b>100</b>	<b>160</b>	<b>100</b>

**FIGURE 3 – Land Won Sand and Gravel by End Use 2020**

Table 8 Land Won Sand & Gravel Sales by Mineral Planning Authority (thousand tonnes)				
Region	Mineral Planning Authority	Sand & Gravel Sales 2018	Sand & Gravel Sales 2019	Sand & Gravel Sales 2020
Powys (inc Brecon Beacons)	Powys	120	172	160
South West Wales	Carmarthenshire			
	Ceredigion			
	Pembrokeshire Coast NP			

5.1 Table 8 shows the Local Planning Authorities where land won sand and gravel is produced. The total sales for 2020 have decreased by 12,000 tonnes from 2019.

#### LANDBANK

5.2 Table 9 below sets out the land won sand and gravel landbank in the same way as the crushed rock landbank has been set out in Section 4 above. It includes both the three year sales average and the 10 year sales average. Dormant sites have **not** been included.

Table 9 Land Won Sand & Gravel Reserves and Landbanks by Mineral Planning Authority (million tonnes) based on 3 year average sales 2018-2020 and the 10 year average sales 2011-2020				
Mineral Planning Authority	Sand & Gravel Reserve 2020	3-year Average Annual Sales 2018-2020	10-year Average Sales 2011-2020	Landbank (years) based on 3 year sales average
Powys	1.97	0.15	0.21	>50
Carmarthenshire				>50
Ceredigion				6
Pembrokeshire Coast NP				N/A

5.3 Only Ceredigion has a landbank of less than 22 years. The West Wales Sub-region together with Carmarthenshire is working collaboratively to plan strategically for adequate reserves of land won sand and gravel in the period up until 2042 rather than relying on Ceredigion in isolation. Discussions between the four Authorities have taken place during 2020 and will continue with a view to producing a Statement of Sub-regional collaboration.

5.4 Care must be exercised in relying on the landbank figures for Powys and Carmarthenshire as these are based on very small annual sales from relatively small sites.

## 6.0 MARINE DREDGED SAND & GRAVEL

6.1 Marine Dredged Sand and Gravel is landed in the Region by Cemex UK Marine Ltd, Hanson Aggregates Marine Ltd, Tarmac Marine Ltd, Severn Sands Ltd and Llanelli Sand Dredging Ltd.

6.2 Marine Licences (as at December 2020) exist in Welsh waters for North Middle Ground, Culver Extension (Area 526), North Bristol Deep (Area 470/1 and 470/2) and Nobel Bank (Area 472). A site with both planning permission and a Marine Licence at Bedwyn Sands, Monmouthshire also contributes towards sales data. There are also licences in English waters of the Bristol Channel. Production from Welsh licence areas may be exported to England and vice versa.

<b>Mineral Planning Authority</b>	<b>Landing Port</b>	<b>2018 Tonnages</b>	<b>2019 Tonnages</b>	<b>2020 Tonnages</b>
Neath Port Talbot	Briton Ferry/Port Talbot	4,661	10,676	14,921
Carmarthenshire	Burry Port	101,989	158,449	177,686
Cardiff	Cardiff Docks	163,807	217,598	195,377
Pembrokeshire	Port of Pembroke	26,935	19,744	15,689
Newport	Newport Docks	217,928	227,688	236,480
Monmouthshire (Bedwyn Sands)	Newport	*	*	*
Swansea	Swansea Docks	62,720	27,378	35,439
<b>Total</b>		<b>578,040</b>	<b>661,533</b>	<b>675,592</b>

Source: The Crown Estate Summary of Statistics 2018, 2019 and 2020

\* The aggregate removed from the Bedwyn Sands in Monmouthshire is partly above low water mark and that area is therefore under the jurisdiction of the Local Planning Authority. The material is landed in Newport by a single company. The landing data for that Company is therefore confidential.

6.3 Landings of marine sand and gravel have increased year on year between 2018 and 2020. Landings at Newport, NPT and Carmarthenshire have seen a minor improvement and landings in Cardiff have decreased slightly between 2019 and 2020.

**Table 11**  
**Marine Sand & Gravel Sales by end use 2019 & 2020 (000 tonnes)**

	<b>Tonnes 2019</b>	<b>2019 %</b>	<b>Tonnes 2020</b>	<b>2020 %</b>
Sand – Asphalt	167	20	171	23
Sand – Mortar	402	50	364	50
Sand – Concreting	113	14	177	24
Gravel (suitable for concrete aggregates)	104	13	0	0
Sand & Gravel (suitable for construction fill)	22	3	20	3
<b>Total</b>	<b>808</b>	<b>100</b>	<b>732</b>	<b>100</b>

**FIGURE 4 – Marine Sand and Gravel Sales by End Use 2020**

6.4 Marine Sand and Gravel Sales in 2020 have significantly exceeded the amount of material dredged from Crown Estate licence areas. Part of the reason for this difference is that sales figures include material dredged from the Bedwyn Sands which is not within The Crown Estate. In addition, there would be sales from stocks being held at the wharfs and differences

in timing between sales and landings. Conversion factors from cubic metres to tonnes may also be playing a part.

6.5 Sales of marine sand and gravel have decreased from 808,000 tonnes in 2019 to 732,000 tonnes in 2020, a decrease of 76,000 tonnes. Sales of gravel suitable for concrete have declined from 104,000 tonnes in 2019 to nothing in 2020 whilst at the same time sales of sand for concrete have increased by 64,000 tonnes. Sand for mortar reduced by 38,000 tonnes.

## 7. SECONDARY AGGREGATES

7.1 Secondary Aggregates are usually defined as

- aggregates obtained as a by-product of other quarrying and mining operations, such as china clay waste, slate waste and colliery spoil, or
- aggregates obtained as a by-product of other industrial processes, such as blast furnace slag, coal-fired power station ash, incinerator ash and spent foundry sand.

A list of Secondary Aggregate sites within the SWRAWP Region is set out in Appendix C

7.2 The Survey response in relation to Secondary Aggregate Sales in 2020 was negligible.

## 8. RECYCLED AGGREGATES

8.1 Recycled Aggregates are defined as aggregates obtained from the demolition or construction of buildings or structures or from civil engineering works, including asphalt road planings and railway ballast. A list of known aggregate recycling facilities in the SWRAWP Region is set out in Appendix D.

8.2 Even though recycled materials play an important role as a substitute for primary aggregates it is difficult to obtain accurate figures of the volumes produced.

## ROAD PLANING ARISING

8.3 No data available.

## 9. RTS 2<sup>nd</sup> REVIEW

9.1 The Regional Technical Statement (RTS) is a requirement of Minerals Technical Advice Note 1: Aggregates (MTAN1) which was issued by the Welsh Government in March 2004.

9.2 MTAN1 sets an overarching objective which seeks to ensure a sustainably managed supply of aggregates (which are essential for construction), striking the best balance between environmental, economic and social considerations. The RTS provides a strategic basis for LDPs in the region.

9.3 The first Regional Technical Statement for the area covered by the South Wales Regional Aggregates Working Party was published in October 2008. The RTS 1<sup>st</sup> Review was published in August 2014 and the RTS 2<sup>nd</sup> Review was published in September 2020.

9.4 The RTS2 recommends that the future quantities of aggregate which need to be provided for from each Local Planning Authority area (apportionment) is essentially based on the higher of the 3-year sales average and the 10 year average of sales, refined as necessary to take account of housing completions and other factors of sustainability. The apportionment is calculated over 25 years for crushed rock (LDP period plus 10 years) and 22 years for sand and gravel (LDP period plus 7 years).

9.5 The annual crushed rock apportionments contained within Table 5.3 of the RTS2 (as corrected by the Policy Clarification Letter dated 11 November 2021) are provided in Table 12 below together with the sales figure for 2020. The purpose of this comparison is to assess whether there is a danger of under-provision within any Local Authority area. Sales exceeding the annualised sales figure is merely an early warning that aggregate reserves are being used more quickly than anticipated in the RTS2 and there may be a danger of under-provision within the Local Development Plan period. Further detailed assessment would be required in each case.

**Table 12**  
**Crushed Rock Sales in 2020 by Mineral Planning Authority (million tonnes) in comparison to the RTS2 annualised apportionment**

Region	Mineral Planning Authority	Crushed Rock Sales 2020	RTS2 Annualised Apportionment
Powys (inc Brecon Beacons)	Powys	3.07	3.519
	Brecon Beacons NP		0.368
South West Wales	Carmarthenshire	0.65	1.102
	Neath Port Talbot	0.33	0.305
	Pembrokeshire	0.52	0.677
	Pembrokeshire Coast NP		0.259
	Ceredigion	0.09	0.272
	Swansea	0	0.305
South East Wales	Blaenau Gwent	0.62	0.204
	Caerphilly		0.546
	Torfaen	0	0.150
	Newport	0	0.452
	Monmouthshire	0	0.242
	Rhondda Cynon Taf	0.47	0.765
	Merthyr Tydfil		0.204
	Bridgend	2.17	0.711
	Cardiff		1.411
	Vale of Glamorgan		0.682
	<b>SOUTH WALES TOTAL</b>		<b>7.92</b>

9.6 Sales in 2020 for Brecon Beacons National Park, Bridgend and Neath Port Talbot exceeded the annualised apportionment figure. In the South Wales context as a whole, sales were approximately 65% of the total annualised apportionment required within the region.

9.7 RTS2 recommended minimum allocations necessary in each of the following Local Planning Authority areas – Ceredigion (1.428 million tonnes), Pembrokeshire (212,000 tonnes), Swansea (7.636 million tonnes), RCT (9.295 million tonnes), Cardiff (7.475 million tonnes), Newport (11.3 million tonnes), Torfaen (3.75 million tonnes) and Blaenau Gwent (3.78 million tonnes). These allocations are yet to be addressed by the LPA’s.

9.8 The annual sand and gravel apportionments contained within the RTS2 are provided in Table 15 together with the sales figure for 2020.

<b>Table 13 Sand and Gravel Sales in 2020 by Mineral Planning Authority (million tonnes) in comparison to the RTS annualised apportionment</b>			
<b>Region</b>	<b>Mineral Planning Authority</b>	<b>Sand &amp; Gravel Sales 2020</b>	<b>RTS Annualised Apportionment</b>
South West Wales	Carmarthenshire	0.17	0.003
	Pembrokeshire		0
	Pembrokeshire Coast NP		0.118
	Ceredigion		0.188
<b>SOUTH WALES TOTAL</b>		<b>0.17</b>	<b>0.309</b>

9.9 Sales in 2020 for Carmarthenshire slightly exceeded the annualised apportionment figure. In the South Wales context as a whole, sales were approximately 55% of the total annualised apportionment required within the region.

9.10 RTS2 recommended minimum allocations necessary in – Ceredigion (3.626 million tonnes). There are allocations within the current Local Development Plan but these will not meet the entire allocation requirement.

9.11 The RTS2 notes that the apportionment recommendations do not take fully into account all factors that may be material to the ensuring of an adequate supply of aggregates obtained from appropriately located sources. Such factors include:-

- The technical capability of one type of material to interchange for another.
- The relative environmental cost of substitution of one type of material by another.
- The relative environmental effects of changing patterns of supply.
- Whether adequate production capacity can be maintained to meet the required supply.

9.12 The RTS2 also states that where it is justified by new evidence, it is open for individual Local Planning Authorities to depart from the apportionment and allocation figures recommended in the RTS. In doing so however, a Local Planning Authority would need to demonstrate that their intended departure would not undermine the overall strategy provided by the RTS itself.

## 10. MAJOR INFRASTRUCTURE PROJECTS

Major infrastructure projects are an important consideration in the assessment of the future demand for aggregates. The following is a list of projects which may have an impact on future demand if they go ahead

A465 Heads of the Valleys Road dualling

Cardiff Eastern Bay Link Road

Cardiff Capital Region Metro Project

A4226 Five Mile Lane Improvements (Weycock Cross, Barry to Sycamore Cross)

Northern Access Road (St Athan Enterprise Road) - Under Construction

M4 Junction 34 link to A48 - WelTag Study on-going

Cardiff Airport and St Athan Enterprise Zone

Land at Upper Cosmeston Farm, Lavernock - 576 units

Land West of Swanbridge Road, Sully - 500 units

Swansea City Centre and Fabian Way Redevelopment

Student Accommodation and Office Developments in Cardiff

Major Housing Developments (approx. 14,000 houses) in Cardiff

A40 Llanddewi Velfrey to Redstone Cross Road Improvements

Flood defence works on Pengam Foreshore, Cardiff

Global Centre for Rail Excellence, Onllwyn (Powys / Neath Port Talbot)

Coed Darcy (approx. 2,000 houses + commercial development), Llandarcy

## 11. MONITORING OF PLANNING APPLICATIONS

Planning Applications and Decisions in 2020							
Planning Reference	Site Name	Type	Mineral	Reserve	Date Submitted	Decision	Decision Date

#### 14. MONITORING OF DEVELOPMENT PLANS (at 31.12.20)

Mineral Planning Authority	LDP Adoption	LDP Review Position
Pembrokeshire Coast National Park	LDP2 adopted September 2020	
Caerphilly	LDP adopted in November 2010	Started review process in March 2020. New Delivery Agreement (DA) required
Rhondda Cynon Taf	LDP Adopted in March 2011.	DA approved by WG. Candidate sites October 2020
Merthyr Tydfil	LDP2 Adopted in January 2020.	
Blaenau Gwent	LDP Adopted in November 2012	Delivery Agreement (DA) has been revised. Second call for Candidate sites ongoing. Draft Plan by June 2021.
Pembrokeshire	LDP Adopted in February 2013	Revised DA went to Cabinet in October 2020.. Submission July 2021. Adoption Spring/Summer 2022.
Ceredigion	LDP Adopted April 2013	Preferred Strategy Consultation paused. Third call for sites ongoing. DA to be revised.
Bridgend	LDP Adopted September 2013	Revised DA has been approved. Deposit Plan by June 2021.
Torfaen	LDP Adopted in December 2013	– Revised DA with Welsh Government. Preferred Strategy and second call for sites up until Christmas. Deposit Plan June 2021
Brecon Beacons National Park	LDP Adopted in December 2013	LDP2 paused due to COVID19. DA to be amended
Monmouthshire	LDP Adopted in February 2014	Preferred strategy consultation paused. Revised DA went to Council on 22nd October 2020
Carmarthenshire	LDP Adopted in December 2014	Revised DA required. Aiming to have Plan adopted by July 2022.
Newport	LDP Adopted in January 2015	AMR went to Cabinet October 2020. Recommendation to review the LDP. Informal call for sites in Jan 2021.
Cardiff	LDP adopted in January 2016	Review was due to start in March but suspended. Revised DA and report in early 2021.
Neath Port Talbot	LDP adopted in January 2016	Review Report published in July 2020. 4 <sup>th</sup> AMR published in October 2020.
Vale of Glamorgan	LDP adopted in June 2017.	2nd AMR completed. Will start groundwork for review in June 2021
Powys	LDP adopted in April 2018	2nd AMR due in October 2021.
Swansea	LDP adopted February 2019	1st Annual Monitoring Report (AMR) by end of October

APPENDIX A

MEMBERS OF THE SOUTH WALES AGGREGATES  
WORKING PARTY

(at date of publication)

**Rhodri Griffiths** (Chair)  
Head of Place & Sustainability  
Carmarthenshire County Council

**Hugh Towns** (Secretary)  
Regional Minerals & Waste Planning Manager  
Carmarthenshire County Council

**Thomas Boothroyd** (Asst. Secretary)  
Development Management Officer (Minerals & Waste)  
Carmarthenshire County Council

**Steve Smith**  
Development Services Manager  
Blaenau Gwent County Borough Council  
(Represented by Steph Hopkins)

**Catherine Mealing-Jones**  
Chief Executive  
Brecon Beacons National Park  
(Represented by Davina Powell)

**Jonathan Parsons**  
Head of Planning  
Bridgend County Borough Council  
(Represented by Richard Matthams)

**Rhian Kyte**  
Head of Planning and Regeneration  
Caerphilly County Borough Council  
(Represented by Ian Mullis)

**Simon Gilbert**  
Head of Planning  
City of Cardiff Council  
(Represented by Stuart Williams)

**Russell Hughes-Pickering**  
Corporate Lead Officer Economy and Regeneration  
Ceredigion County Council  
(Represented by Sarah Groves-Phillips)

**Judith Jones**  
Director of Neighbourhood Services  
Merthyr Tydfil County Borough Council  
(Represented by Craig Watkins)

**Mark Hand**

Head of Placemaking, Housing, Highways and Flooding  
Monmouthshire County Council  
(Represented by Susan Hall)

**Ceri Morris**

Head of Planning and Public Protection  
Neath Port Talbot County Borough Council  
(Represented by Carl Comerford)

**Tracey Brooks**

Head of Regeneration & Economic Development  
Newport City Council  
(Represented by John Gibson)

**Nicola Gandy**

Head of Planning  
Pembrokeshire County Council  
(Represented by Bob Smith)

**Sara Morris**

Director of Park Direction & Planning  
Pembrokeshire Coast National Park  
(Represented by Gayle Lister)

**Gwilym Davies**

Head of Public Protection, Planning and Property  
Powys County Council  
(Represented by Peter Morris)

**Simon Gale**

Director of Prosperity and Development  
Rhondda-Cynon-Taf County Borough Council  
(Represented by Owen Jones)

**Phil Holmes**

Head of Planning and City Regeneration  
City & County of Swansea  
(Represented by Ruth Henderson)

**Rachel Jowitt**

Strategic Director, Economy & Environment  
Torfaen County Borough Council  
(Represented by Adrian Wilcock)

**Marcus Goldsworthy**

Head of Regeneration and Planning  
Vale of Glamorgan Council  
(Represented by)

**Nick Horsley**

Planning Director  
Mineral Products Association

**Mark Russell**

Representative MPA - BMAPA  
Mineral Products Association

**Mark Frampton**

Representative MPA - Hanson UK  
Mineral Products Association

**Andy Cadell**

Representative MPA –Tarmac
